

Patient Fees

Dear Patients,

Welcome to Laser Aesthetic Contouring of Idaho. It is very important that you are aware of the fees associated with your visits and to achieve optimal results.

- A consultation with Dr. Simon and all follow up appointments are free of charge.
- In order to book a procedure date, a down-payment of ½ the procedure cost is required. If necessary you may reschedule your procedure with 2 weeks notice, however your down-payment is **non-refundable**. If you are unable to give 2 weeks notice, you will be charged a \$500 late-rescheduling fee. We highly recommend that you are 100% committed to your surgery before you schedule.
- You will be asked to have blood-work performed in order to insure you are healthy for surgery. The blood-work may be performed at any clinic of your choice, so fees may vary.
- You will be given two prescriptions, an antibiotic and pain medication, these may be filled at the pharmacy of your choosing. Also, a medication that helps to reduce swelling and bruising, can be purchased from our office.
- A compression garment must be purchased prior to surgery. Our office will order this for you. This garment will be worn for at least two weeks and is critical for achieving optimal results.
- TriActive is a laser assisted massage that helps smooth out treated areas and improves microcirculation. Please be aware that we require a minimum of 6 TriActive treatments post-operative to be eligible for a touch-up. TriActive helps expedite the healing process, improve your final result, and sometimes eliminates the need for a touch-up. Prices vary per area(s) treated.
- Prior to surgery you will be responsible for paying your balance in full. If your payment does not go through, your surgery will be rescheduled and you will be charged a late-rescheduling fee.

Thank you for this opportunity to provide your care. If you have any questions regarding billing please call and speak with the office manager.

I have read and understand that I am responsible for office visits, appropriate lab work, and/or surgery fees.
